PROFILE

I am a highly skilled and passionate Product Designer with a focus on creating exceptional user experiences. With a strong background in UX and UI design, I bring over 3 years of industry experience and a solid understanding of software engineering principles.

My expertise lies in transforming product objectives into functional and visually appealing designs. I have a keen eye for detail and a deep understanding of user-centered design principles, ensuring that my designs not only look great but also provide an intuitive and seamless experience for users.

Throughout my career, I have collaborated with venture capital-funded startups and fast-growing companies, leveraging data-driven insights to drive growth and improve conversion rates. By conducting thorough market research and actively seeking stakeholder feedback, I have consistently delivered innovative solutions that meet both user needs and business goals.

I am proficient in using industry-standard design tools and have a solid understanding of front-end development, allowing me to effectively communicate and collaborate with developers and stakeholders. My excellent verbal and written communication skills enable me to clearly articulate design ideas and recommendations, ensuring smooth collaboration across cross-functional teams.

As a self-motivated and entrepreneurial individual, I thrive in fast-paced environments where I can apply my problem-solving skills and creativity to deliver impactful results. My passion for design and technology, coupled with my attention to detail, makes me a valuable asset to any team.

Overall, my expertise in product design, UX/UI principles, and software engineering, along with my strong communication and collaboration skills, allows me to create exceptional user experiences that drive growth and contribute to the success of businesses.

EXPERIENCE

Product Designer / Community Manager

StarHub | November 2022 - PRESENT

- Creating sketches, user flows, wireframes, mockups, and prototyping for brand-new products, new features for existing products, and existing features for existing products.
- Implemented the design strategy, design thinking, and product design processes on products.
- Maintained a high level of quality and consistency for all creative materials by

of Open Source Community Africa,
Member of Starhub Innovation,

contributing and working with the Design Systems.

▪ Collaborated with developers/engineers on the creation/adoption of design systems/libraries and possibly new features.

Frontend Developer

Busydev | October 2021- November 2022

▪ Improved and optimize the performance of existing applications.
▪ Followed SDLC best practices within an Agile environment to produce rapid interaction for clients
▪ Actively behind the team responsible for building(https://hostengines.com/)
▪ Executed Domain-Driven Design, and consumed API with Vue which led to 70% more code flexibility and 50% less error-prone code being pushed.
▪ Teamed on user-centric design strategy in translation.

Frontend developer/Product designer

Hng | July 2021- September 2021

▪ Translated UI/UX design to code in building ZuriChat(https://www.zuri.chat/)
▪ Worked and collaborated with a team of over 200-300 people, using git and also software architecture.
